ORIGIN - Treasury Audit

The ORIGIN - Treasury team asked us to review and audit their ORIGIN - Treasury contract. We looked at the code and now publish our results.

Here is our assessment and recommendations, in order of importance.

Document information

Name	Auditor	Version	Date
ORIGIN - Treasury Audit	Rock, Sophia, Rushairat, Rico, David, Alice	1.0.0	2024-03-04

Audit results

WARNING:

- This audit only covers the Treasury.sol contract; other contracts are not included, and contracts related to interfaces within the contract are not within the scope of this audit.
- The owner can manage the curve variable address; the owner can call the sweepReserve interface to execute token transactions (the administrator has the authority to misappropriate contract tokens).
- deposit (sender stakes, receiving a certain amount of OHM set by the administrator)
 - It is determined that the quantity of exchanged tokens is obtained 1:1 by the administrator-controlled IssuanceToken or by the valuation method of the IBondCalculator interface.
 - The administrator can manage the ERC20 tokens for deposit and who can stake.
